Historical data is not a reliable indicator of future developments.

All returns are net returns. For the ETP+ 95 and for the benchmark 40 basis points are counted as expense ratio. Backtest until 2016.
Mandate since 2016 (blue area).

About Adaptivv

Adaptivv Financial Technologies AG was created in 2016 as a spin-off from the Swiss Federal Institute of Technology Zurich (ETH) and is now considered an established and competent partner when it comes to Drawdown Management for pension funds, banks and family offices.

Since 2016 Adaptivv successfully uses the Bayesian Change Point method to identify regime changes in traditional as well as in digital markets.

Adaptivv is FINMA regulated and supervised by the Swiss Supervisory Organization FINcontrol.

Spin-off | **ETH** zürich

Strategy

Adaptivv Stability Sensor Technology: For 10 years, the Adaptivv Sensor® was developed at ETH Zurich. The Adaptivv Sensor measures the stability of the market real-time and manages the exposure accordingly.

Benchmark: Due to this dynamic allocation and generally long bias, a peer group of Swiss mixed asset funds are a realistic performance benchmark.

Efficient Implementation: The portfolio consists of approx. 50 Swiss stocks, which are controlled individually. The assets, which are not allocated into equities are kept in a money market ETF basket.

Drawdowns: The aim is to minimize market losses through dynamic exposure management (0-100%).

Performance Comparison

	ETP+	Peers
1 Month	2.54%	2.33%
3 Months	3.84%	4.62%
YTD	3.84%	4.62%
3 Years	5.63%	-3.13%
Live	6.30%	6.46%
Since 2016 Mandate	59.25%	12.40%
Since Index Start	1,060.30%	18.85%

Sortino Ratio	0.08	0.01
Max. Drawdown	25.08%	44.08%
2022 Drawdown	15.74%	26.87%

ETP+ Benefits for Investors

The ETP+ label offers distinct innovations for the ETP market in Switzerland. ETP+ uses not only a reputable custodian and collateral agent, both based in Switzerland, but also provides for daily independent checks, which serve as key mitigators of the issuer risk. In combination with Leonteq as an issuer that is a regulated securities firm with an investment grade rating and a strong capital position, this new setup offers a compelling differentiation to existing ETP providers.

Collateralization to safeguard investor interests

Leonteq is partnering with SIX to reduce issuer credit risk and to protect ETP+ investors' interests by collateralizing any ETP+ liabilities over the product lifecycle.

Under this arrangement, collateral is held at SIX SIS AG, and SIX Repo AG, in its function as collateral agent, is responsible for daily inspections of the collateral. The collateralization technique used for ETP+ is based on an established framework with SIX that has been in place since 2012

Adaptivv Financial Technologies Ltd is an approved ETH Zurich Spin-off

Adaptivv is FINMA regulated and supervised by the Swiss Supervisory Organization FINcontrol.

Risks

- The investor may suffer losses in the amount of the negative performance of the underlying between the initial fixing and maturity
- The investor in the product may be exposed to foreign exchange rate risk depending on the composition of the index.
- Investment risk is allocated in specific sectors, countries, currencies or companies. Consequently, the fund is vulnerable to local economic, market, political or regulatory events. The value of equities and equity-related securities may be affected by daily price movements on stock exchanges. Other factors include political and economic news and important corporate events and results.
